WORKPLACE WELLNESS

The benefits of PRE-EMPLOYMENT, FIT for WORK assessments

When you employ a new staff member it is a time consuming and expensive process, there's the recruitment, the setting up on pay roll, the providing of clothing, PPE's and training. It makes sense to check that the applicant is **fit for work** before you invest more time and money into the person,

a pre-employment assessment will provide this for you. A pre-employment will assess muscular skeletal abilities, provide baseline hearing, vision and lung function, and include a healthy Heart check, A drug test can be included to give a comprehensive health check.

A pre-employment is cost effective and worth the weight in gold if it prevents you from employing an unsuitable candidate. Contact us for more information.

FLU SEASON IS JUST AROUND THE CORNER

WE OFFER AN ONSITE VACCINATION PROGRAMME, IT IS QUICK, EFFICIENT AND HAS A GOOD UPTAKE, ENSURING A GOOD PROTECTION ACROSS YOUR WORKPLACE AND AT HOME

Influenza can be a serious illness that is sometimes fatal.

Infection with the influenza virus may lead to a stay in hospital for any age group but particularly if you are elderly or have an ongoing medical condition. Influenza can make an existing medical condition, such as asthma or diabetes, a lot worse. Even if you do not end up in hospital, influenza can keep you in bed for a week or more, preventing you from doing work, sport or just about anything that requires leaving the house.

DON'T LET THE FLU GET YOU OR YOUR WORKPLACE
